# MANOJ DHAKE

Software Engineer

## SUMMARY

- Writing maintainable and extensible code without breaking interface in team environment.
- Involving in frequent code review of peer team member.
- Designing and Developing web application by focusing on Project requirement.

## EDUCATION

### B.E in CIVIL

Apr '14 - May '18

Datta Meghe Collage of Engineering

Mumbai, IN

Navi Mumbai

- Percentage: 71%

### PG-DAC

Aug '19 - Feb '20

SM VITA

Mumbai,IN

JUHU

- Percentage: 67%

## Technical Skills

- Core Java, J2EE and Spring
- Framework MS .NET
- JavaScript, HTML,
- CSS
- React JS
- MySQL

## Professional Experience

- **SteepGraph Systems Pvt. Ltd (March 2020 - Present)**

**Role :- Software Engineer**

**Responsibilities :-**

**Requirement Gathering.**

**Client Communication.**

**Writing sustainable and secure code for backend java.**

## KEY PROJECTS

- **Domain: Web Application | Programming Languages: Angular 8, Java, Spring Restful API, Hibernate, Maven, MySQLDatabase| Dec '19'-Feb'20**
  - The project is a web application for college Website.
  - Responsibility:
    - Designing Rest API with JPA.
    - Managing Database schema (MySql).
    - Component designing.
    - Implementing new features in existing Microservice Architecture.

- **Domain: Web Application | Programming Languages: HTML, CSS, JavaScript, Java, Spring MVC, jQuery, Ajax | Mar '20 - Jun '21**
  - Worked on ETL Framework development based on spring mvc.
  - This is web-based application with beautiful and user-friendly UI in front with Java Spring MVC and Oracle as backend.
  - Responsibility:
    - Designing Rest API with Hibernate.
    - Implementing core JavaScript, HTML, CSS
    - Managing Database schema (oracle).
    - Experience working knowledge on web services and OOPS concept.
- **Domain: WEB App Test Automation| Programming Languages: Java, Selenium, TestNG | Jun '21 -Present**
  - The application and run test script by using Selenium web driver (in java) TestNG framework, bug fixing and check it is working exactly same as in manual testing.
  - Responsibility:
    - Development of automation script with selenium 4.
    - Write automation script.
- **Domain: WEB App Recorder| Programming Languages: Java, Selenium, TestNG | Jun '21- Present**
  - The application is to generate the script by manual testing the application.
  - Write some relevant code snippets to track the user activity on 3D Experience platform from this script is generated by code snippets in the application
  - Cross verifying the generated script with 3DX NATIVE App Test automation capabilities that the execution of application is working same as in manual testing.
  - Responsibility:
    - Use of Core JavaScript to build the app for recording functionality.
- **Domain: 3DX-Experience Platform| Programming Languages: Core Java | Dec '21- Present**
  - Creating JPO mainly known as Java Class which can be execute by in built 3DX-Experience platform
  - Responsibility:
    - Optimize code and Robust code.
    - Core Java
    - Use Git for version control for all the projects.

## Roles and Responsibility

---

- Writing sustainable and secure code for backend in java.
- Provided technical leadership on troubleshooting and resolution of issues.
- Good Coordination with offshore and onsite team.
- Attended meetings on development and defects on a regular basis.
- Worked on Styles, CSS, JavaScript for dynamic UI functionality.
- JSP, Spring Boot, MVC Architecture for Web.
- API's using fetch API and Google Authentication integrated with React-JS.
- Work on JavaScript Token Spring boot + JWT + JPA + Oracle database.
- Learn to build RESTful Microservices with Spring Boot and Spring Cloud.

## TECHNICAL SKILLS

---

- **Programming languages:** Java, C, C++, C#
- **Java Technologies:** J2EE, JSP, Servlets, JDBC, Java Mail, Design Patterns: Singleton, Factory Pattern
- **Frame works:** Spring boot, Spring MVC, Hibernate
- **ORM Technologies:** JPA, Hibernate
- **Environment:** Java,

- **JDK 8 Scripting Languages:** JavaScript
- **Open Source:** Maven, Gradle, Web Services, log4j
- **Web Technologies:** HTML5, CSS, AJAX, jQuery
- **Data Modelling:** XML, JSON
- **IDE:** Eclipse
- **Web Servers:** Apache Tomcat
- **Data Management:** MySQL, Oracle SQL Developer 12c
- **Platforms:** MS Window
- **Tools:** SmartGit GUI, GIT

## KEY SKILLS

---

- **Web Application Development**
- **Backend Development**
- **Unit Testing**
- **Software Testing**
- **Coding & Troubleshooting**
- **Team Management**

## CERTIFICATE

---

- Udemmy Certificate in React-JS

## ADDITIONAL INFORMATION

---

- **Languages:** Hindi, English
- **Interests:** Reading
- **Skills:** Active listening, problem solving, Leadership, Time management and Management skills
- **Hobbies:** Cooking or gardening
- **Charity or volunteer work**
